

NORPAC CONTAINER- BOARD

Your BEST Choice for World-Class Containerboard Products!

NORPAC is a world-class producer and recognized leader in the development of 100% lightweight recycled liner and medium, dedicated to creating the most high-quality and environmentally sustainable containerboard on the market.

You want some numbers?

HERE IS HOW WE RATE IN LIFE CYCLE ASSESSMENT:

- We are 36% better than the industry average in our Human Health Impact scores.
- We are 44% better on Ecosystem Impact scores and 76% better on Resources Impact scores.
- We are 83% lower in our carbon emissions.

You want committment?

QUALITY AND PERFORMANCE

Our containerboard is not only produced with 100% recycled wastepaper, it gives you superior performance, runnability and printability in your operation. Customers report higher efficiencies in their operations when running NORPAC containerboard.

SUSTAINABILITY

Our investments in technology and processes have created a system that captures more post-consumer waste than any other paper mill. This means we keep even more paper out of landfills.

FLEXIBILITY

We are an independent producer, located in the Pacific Northwest, focused entirely on the needs of our employees and valued customers. Meeting our customers' need is our top priority.

INNOVATION

NORPAC's mill is equipped with state-of-the-art technology and has three of the most modern, largest paper machines. We welcome the challenge to create new and exciting products that continually exceed expectations.

HYDROGUARD

Provides outstanding water holdout. HydroGuard products are widely used in agricultural packaging. Unlike wet-strength papers, HydroGuard is 100% recyclable!
