

Paper Recycling

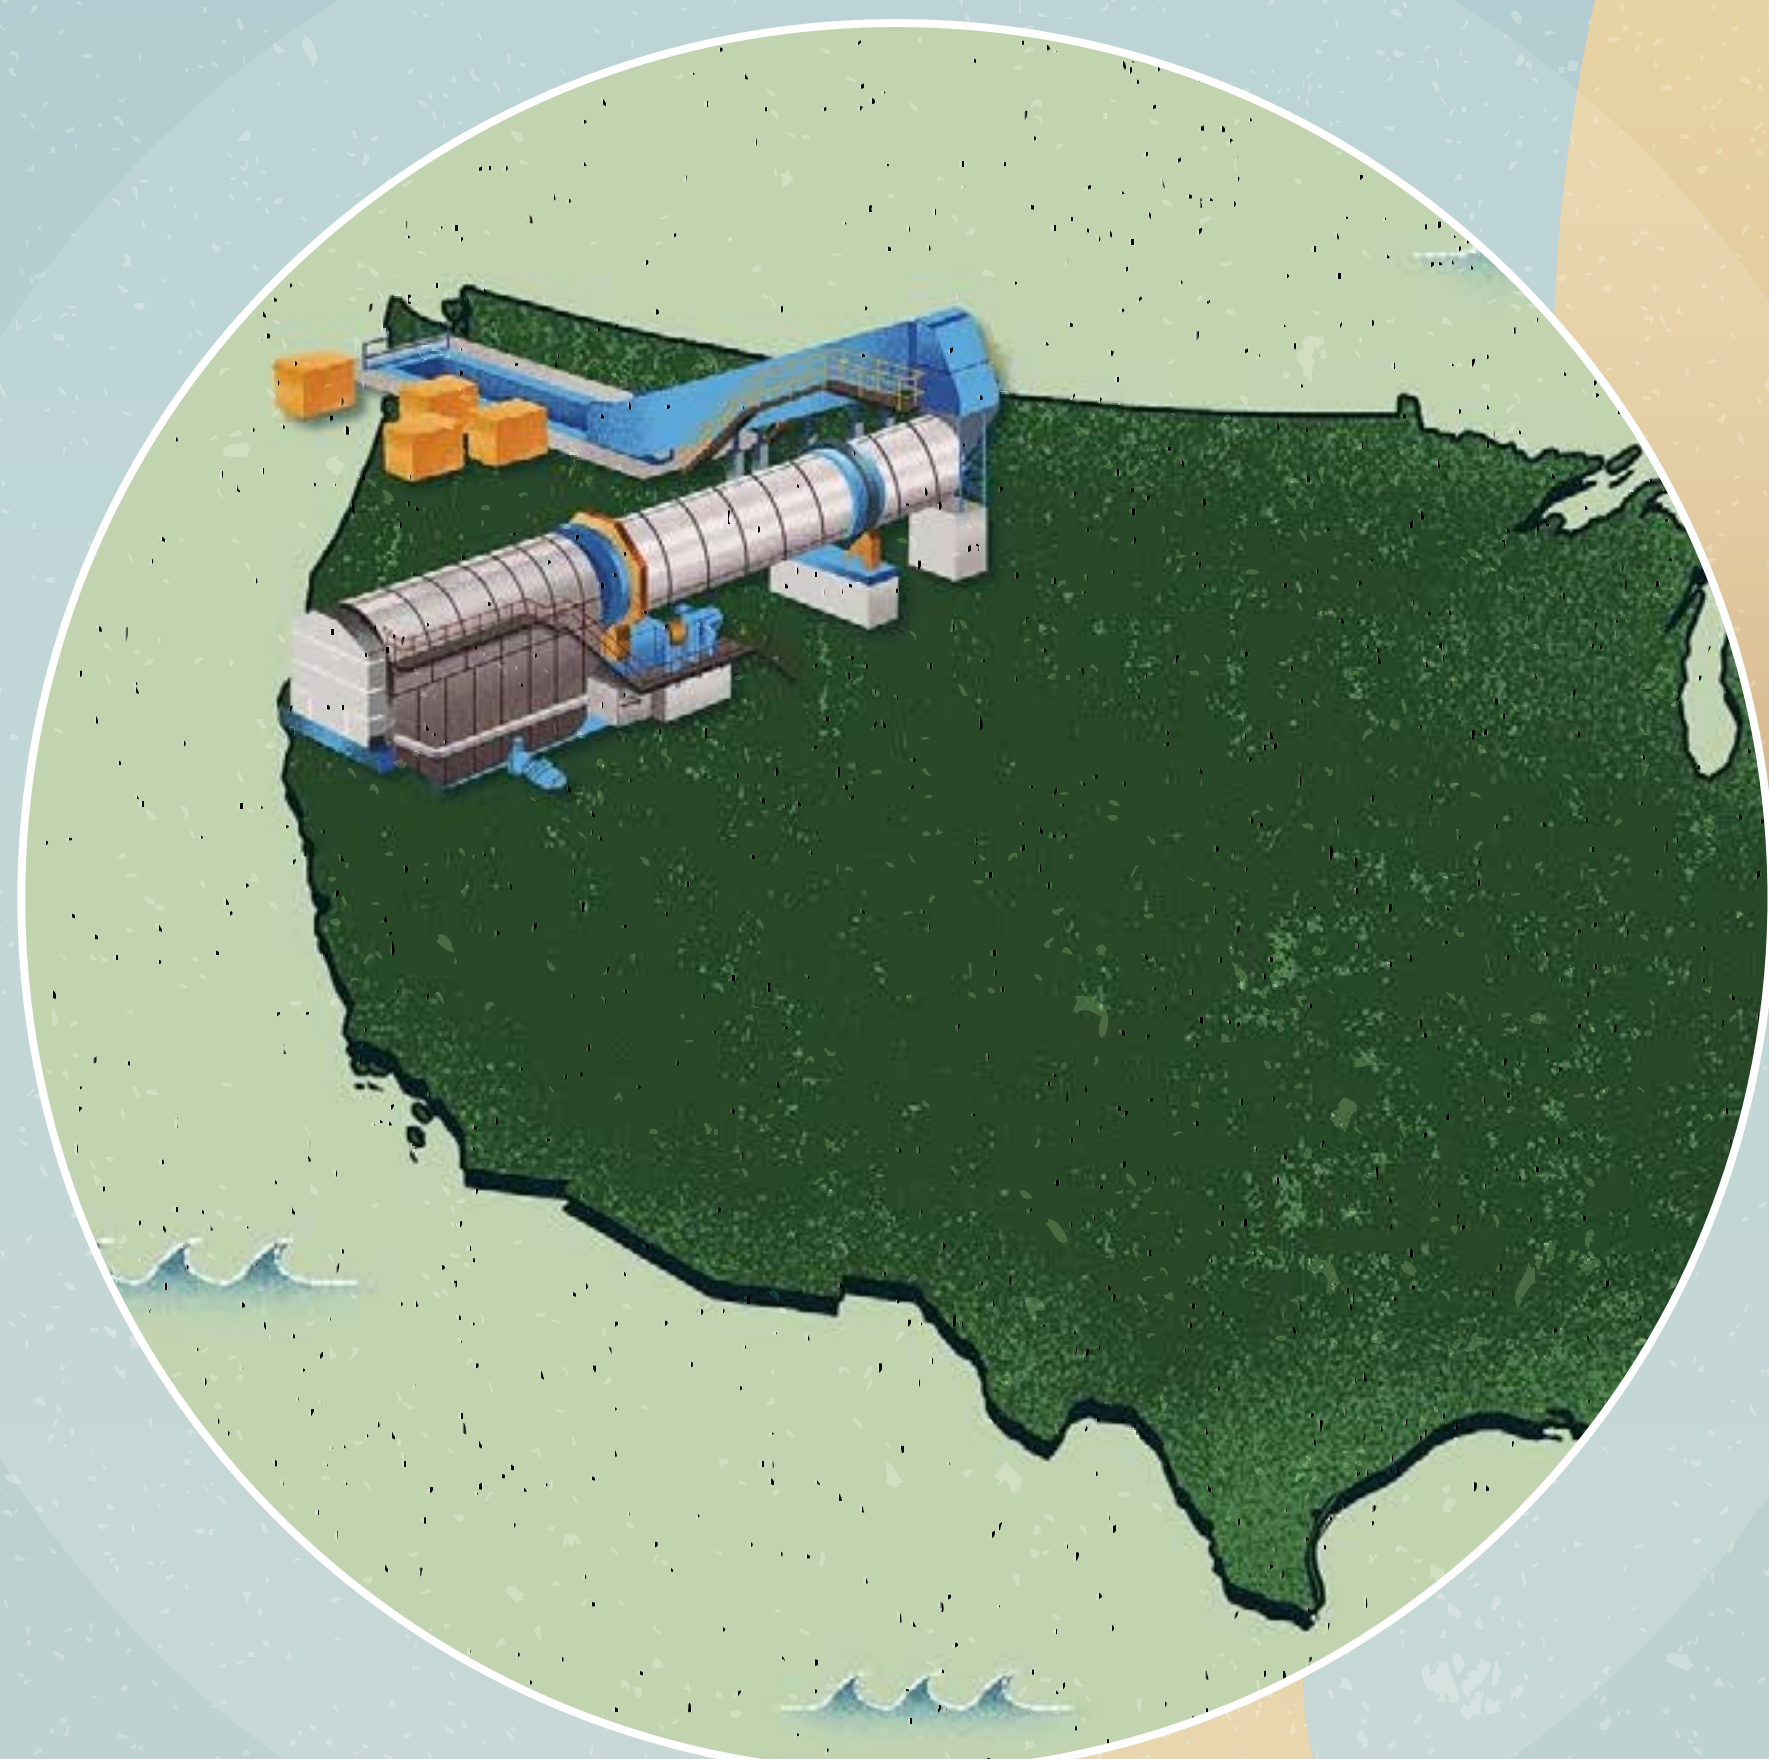

WHAT'S THE PROBLEM

The way we recycle is a giant mixed mess adding to greenhouse gases which pollute our beautiful world

WHAT OTHERS DO/DON'T DO

Most paper mills will take uncontaminated paper, but not mixed mess with plastics, glass, and tin can trash.

So it ends up landfill and then greenhouse gases

SOMETHING BIG IS HAPPENING

1 MILLION TONS PER YER RECYCLING POWER

80% LOWER GREENHOUSE GAS EMISSIONS

WHY DOES THIS MATTER?

NORPAC keeps the mixed mess from loading up landfills

Doing our part – and then some – to lower greenhouse gas emissions

WHAT IT MEANS FOR YOU

100% RECYCLED PAPERS MADE FROM LOCALLY SOURCED WASTEPAPER

95% PCW CONTENT (POST-CONSUMER WASTE)

80% LOWER GREENHOUSE GAS EMISSIONS

96% RENEWABLE ELECTRICITY

STRONG, HIGH-QUALITY, LIGHTWEIGHT PAPERS
